

Temperature Control Switch

P/N: 5600TC

For Mini-Weld Model 6

The 5600TC is functionally the same as the temperature control switch that comes on the Mini-Weld Model 6. However, this switch is equipped with a receptacle end to make replacing burned out elements quick and easy. Instead of hard wiring the element to the switch, you simply unplug the burned out element and plug in the new one! Replacement can be done in seconds.

Benefits:

- Saves money by allowing the user to quickly replace heating elements
- Makes upgrading to the “Big Momma” a breeze.
- Increases safety and convenience. No need to open the switch box to wire in the new element.
- Features a new, high quality switch with smoother function.
- All components available individually.

***Makes element replacement
fast and easy!***

Kit Contents:

- Durable rubber cords
- Sturdy, powder coated metal control box
- Fully grounded
- High quality switch
- Belt clip for convenience
- Powers up to 150 watt elements!
- 110-120VAC
