

# WELDER TRADE-IN REBATE

Polyvance is providing rebates of up to \$600 for customers upgrading old nitrogen plastic welders to the latest specifications.

Polyvance built plastic welders between 2006 and 2013 that did not feature a pressure safety switch. This can be a safety issue because the heating element will continue to heat even if there is no gas flow through the welder. This will cause the torch to overheat, which may melt the handle and burn out the heating element.

The 6053 Hot Air Welder can be recognized by its gray sheet metal enclosure. As a nitrogen welder, the 6053 was assembled with a black nitrogen-air switch mounted to its top, with a part number of 6053N2. The welder and cart assembly was identified as Part Number 6056. These welders displayed the "Urethane Supply Company" brand, Polyvance's company name prior to 2016.

Polyvance is encouraging users of these old welders to upgrade to a new welder. The rebate level varies depending on the model that is purchased:

Unit Purchased	Rebate
8203	\$600
8202	\$400
8201	\$300
8001	\$100

This trade-in rebate is also valid on newer models and for owners of competitive nitrogen plastic welders. This rebate offer expires on 12/31/2024.

## REBATE FORM

Company Name: \_\_\_\_\_

Address: \_\_\_\_\_

\_\_\_\_\_

Contact Name: \_\_\_\_\_

Phone Number: \_\_\_\_\_

Email Address: \_\_\_\_\_

To receive the rebate check, you must do the following:

1. Take a photo of the old welder's serial number
2. Get a copy of the invoice showing your new welder purchase (date must be on or after 01/08/2024)
3. Email this completed form, the photo of the old welder's serial number, and the invoice for the new welder to [info@polyvance.com](mailto:info@polyvance.com).
