

Zero VOC Plastic Cleaner

Polyvance's EcoPrep is a zero VOC plastic cleaner designed to perform as well as solvent-based plastic cleaners when preparing plastic for repair and refinishing operations. EcoPrep has no use limitations in tightly controlled VOC regions and is the perfect substitute for Super Prep plastic cleaner when a solvent free cleaner is desired. EcoPrep is an approved cleaner for use with Bumper and Cladding Coat Adhesion Primer.

Use EcoPrep before every plastic repair and refinishing job to ensure the best performance of fillers, paints, adhesion promoters, and other plastic repair applications.

Benefits:

- Zero VOCs!
- Easy to use.
- Non-flammable.
- Cleans plastics as well as Super Prep Plastic Cleaner, but without using solvents.
- Removes mold release agents and silicones.
- Safe for use on all plastics.
- Made in USA!

Application:

- On new plastic, simply spray on EcoPrep, allow to soak approximately 15 seconds, then wipe off with a clean paper towel, turning the towel with each pass.
- On excessively dirty parts, first wash with 1020 Scuff Soap and water, then do the final cleaning with EcoPrep, as described above.
