Bumper & Cladding Coat Textured Plastic Restorer

Urethane Supply Company's Bumper & Cladding Coat PermaShine is a clear coating designed to protect new textured automotive plastics from fading and restore the appearance of faded textured plastics. PermaShine will enhance the color, improve gloss, and permanently protect textured TPO plastics. The protective coating sticks so well that a pressure washer cannot blast it off. PermaShine may be applied using a spray gun, aerosol can, or foam roller.

Benefits:

- Tremendously improves the appearance of faded textured plastic bumpers and trim.
- Permanently improves appearance -- not a quick-fading shine that will disappear in a few weeks.
- Provides built-in UV protection to help prevent new textured plastic trim from fading.
- Sprays on beautifully or may be rolled on for maximum convenience.

Application:

- Clean textured plastic with 1000 Super Clean plastic cleaner. Using quality tape and paper, mask off areas where PermaShine is not wanted.
- Shake aerosol or bulk can of PermaShine to mix thoroughly.
- For bulk spraying, apply PermaShine with a 1.0 - 1.3 mm nozzle HVLP gun.
- Using overlapping strokes, spray one coat of PermaShine onto surface until the entire surface is wet.
- Allow to dry completely.
- Aerosol users: Turn can upside-down and spray until nozzle clears.
- HVLP gun users: Pour unused portion back into the can and clean gun with lacquer thinner.
- PermaShine may also be rolled on using a compact foam roller. Saturate the roller with PermaShine, then roll the part evenly. Very lightly re-roll with a desaturated roller to pop any air bubbles or to touch up any unevenness. The roller should be replaced after each panel is completed to prevent the roller from deteriorating. Four rollers are typically required per vehicle. A foam brush may be used for detailed areas prior to rolling.

PermaShine Package Specifications

Part No.	Size	Description
3620-4	Quart	F-style can, bulk
3620-1	Gallon	F-style can, bulk
3620-A	Aerosol	11 oz. aerosol

PermaShine Pricing

Part No.	Suggested User Price
3620-4	\$67.95
3620-1	\$239.95
3620-A	\$24.95

VOC Content of PermaShine: 2.09 lb/gal (251.7 g/L)
MIR Value of PermaShine Aerosol: 1.318
