

Plastic Stapler

Polyvance's cordless rechargeable 6203 Hot Spot Plastic Stapler defines plastic reinforcement simplicity. Reinforcing plastics with the 6203 Hot Spot is quick, strong, and cost effective. The Hot Spot Stapler is perfect for holding broken tabs in position while making weld repairs. With our wide variety of specialty staples, you will be able to strengthen virtually any type of thermoplastic repair, from inside and outside corners to narrow mounting tabs.

To operate, simply insert a staple into the brass contacts then press the button twice until the LED indicator light turns red. Press the hot staple into the thermoplastic to secure and reinforce the damaged area.

Features:

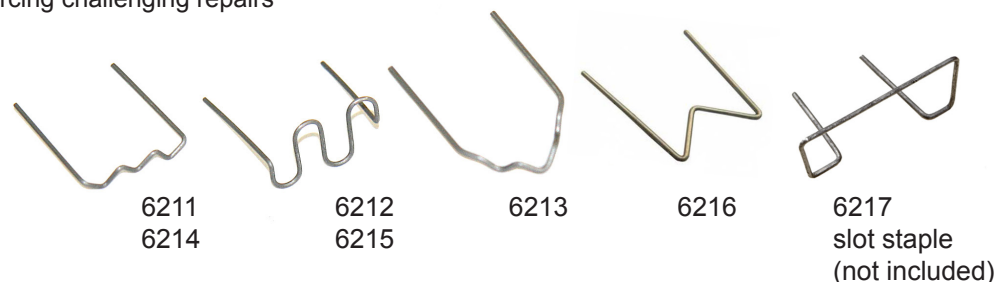

- Multi-position staple contacts
- LED light for illuminating tight spaces
- Simple one button operation
- DC rechargeable power allows use of up to 700 staples on a single charge
- Accommodates all staple sizes
- Charger, batteries and storage case included
- One year limited warranty

Benefits:

- Holds broken plastics together securely for weld repairs
- Makes plastic repairs stronger
- Simplifies aligning and reinforcing challenging repairs
- Improves shop productivity
- Holds headlight tabs in place while doing weld repairs
